Toxicology 107 (1996) 247–248

TOXICOLOGY

Volume contents

Volume 107 (1996)

In vivo studies of cadmium-induced apoptosis in testicular tissue of the rat and its modulation by a chelating agent **(Administration of the chelating agent within one hour of Cd mitigates the lesions)**
C. Xu, J.E. Johnson, P.K. Singh, M.M. Jones, H. Yan, C.E. Carter (Nashville, TN) 1–8

2,4-Dichlorophenoxyacetic acid affects the attachment of *Azospirillum brasilense* Cd to maize roots **(The herbicide increases attachment of the bacterium to the root)**
E. Jofré, G. Mori, S. Castro, A. Fabra, V. Rivarola, H. Balegno (Córdoba, Argentina) 9–15

Frequency and relationships of clinical chemistry and liver and kidney histopathology findings in 13-week toxicity studies in rats **(Clinical chemistry may help to predict eventual histopathological lesions)**
G.S. Travlos, R.W. Morris, M.R. Elwell, A. Duke, S. Rosenblum, M.B. Thompson (Research Triangle Park, Durham, NC) 17–29

Effects of in vivo treatments of nicotine and benzo[*a*]pyrene on the epidermal growth factor receptor in hamster buccal pouch **(Combined application of nicotine and benzo[a]pyrene reduces EFG levels in the salivary gland)**
S.-L. Wang, J. Feng, A. Correa, M. Brigham, C.Y. Wu-Wang (Newark, NJ) 31–38

Effect of curcumin and eugenol on iron-induced hepatic toxicity in rats **(These spice ingredients diminish the oxidative damage induced by iron)**
A.Ch. P. Reddy, B.R. Lokesh (Mysore, India) 39–45

Immunotoxicology

Dose-response relationships of cytotoxicity, PFC response and histology in the spleen in rats treated with alkylating agents **(Decreases in weight and cellularity and histological changes in the spleen of rats were detected at doses of alkylating agents which suppressed PFC responses)**
T. Doi, H. Nagai, R. Tsukuda, T. Suzuki (Osaka, Japan) 47–60

Evaluation of local toxicity after repeated intranasal vaccination of guinea-pigs **(No specific toxicity on the nasal mucosa was observed following intranasal vaccination with nonionic glycerides or tetraethyelenglycolglycofurol used as adjuvants)**
S. Gizurarson, G. Georgsson, H. Aggerbeck, H. Thorarinsdóttir, I. Heron (Reykjavik, Iceland; Copenhagen, Denmark) 61–68

Protective effects of niacinamide in staphylococcal enterotoxin-B-induced toxicity **(Niacinamide improved survival of mice after lethal staphylococcal enterotoxin-B challenge, and primarily reduced IL-2 and IFN-γ serum levels)**
R.D. LeClaire, W. Kell, S. Bavari, T.J. Smith, R.E. Hunt (Frederick, MD) 69–81

Mechanism by which 2,3,7,8-tetrachlorodibenzo-*p*-dioxin (TCDD) reduces circulating melatonin levels in the rat **(An extrahepatic disappearance of melatonin is suggested, the mechanism of which remains open)**
R. Pohjanvirta, J.T. Laitinen, O. Vakkuri, J. Lindén, T. Kokkola, M. Unkila, J. Tuomisto (Kuopio, Oulu, Helsinki, Finland) 85–97

Toxic effects of some conifer resin acids and tea tree oil on human epithelial and fibroblast cells **(Dehydroabietic acid is the most cytotoxic of the tested resin acids)**
T.A. Söderberg, A. Johansson, R. Gref (Umeå, Sweden) 99–109

Chronic inhalation exposure to ozone and nitric acid elevates stress-inducible heat shock protein 70 in the rat lung **(Heat shock protein is formed in the lungs of rats exposed to low levels of common air pollutants)**
C.G. Wong, M. Bonakdar, W.J. Mautz, M.T. Kleinman (Irvine, CA) 111–119

Metallothionein gene expression in testicular interstitial cells and liver of rats treated with cadmium
(Enhanced transcription of the metallothionein gene did not result in enhanced translation)
I.M. McKenna, R.M. Bare, M.P. Waalkes (Frederick, MD) 121–130

Relative susceptibilities of C57BL/6, (C57BL/6 × C3H/He)F_1, and C3H/He mice to acute toxicity and carcinogenicity of nickel subsulfide
(Antioxidant capacities of target organs are of importance in determining susceptibilities)
R.E. Rodriguez, M. Misra, B.A. Diwan, C.W. Riggs, K.S. Kasprzak (Frederick, MD) 131–140

Immunotoxicology
Review Article

T cell immune responses to haptens. Structural models for allergic and autoimmune reactions
(Recent developments in the analysis of the structural basis of hapten recognition by T lymphocytes are reviewed)
H.U. Weltzien, C. Moulon, S. Martin, E. Padovan, U. Hartmann, J. Kohler (Freiburg, Germany) 141–151

Toxicology Information and Resources

National Association of Medical Examiner's Pediatric Toxicology (PedTox) Registry
R. Hanzlick (Atlanta, GA) 153–158

Announcement 159–161

Increased oxidant resistance of alveolar macrophages isolated from rats repeatedly exposed to cadmium aerosols
(The biochemical basis for resistance is described)
B.A. Hart, Q. Gong, J.D. Eneman, C-C. Durieux-Lu, P. Kimberly, M.P. Hacker (Burlington, VT) 163–175

Cell protection by fructose is independent of adenosine triphosphate (ATP) levels in paracetamol injury to rat liver slices
(Ten and twenty millimolar fructose protects from paracetamol injury, but ATP is high in the first and low in the second concentration)
F.L. Martin, A.E.M. McLean (London, UK) 177–187

Mercury accumulation in the Squirrel monkey eye after mercury vapour exposure
(A detailed study on the deposition of mercury in the visual tissues after chronic exposure)
K. Warfvinge, A. Bruun (Lund, Sweden) 189–200

Protection in the late stages of paracetamol-induced liver cell injury with fructose, cyclosporin A and trifluoperazine
(The effect of the tripartite combination suggests a paracetamol action on mitochondrial function)
D. Beales, A.E.M. McLean (London, UK) 201–208

HPLC and GC/MS determination of 4-aminobiphenyl haemoglobin adducts in fetuses exposed to the tobacco smoke carcinogen in utero
(A potent tobacco carcinogen crosses the human placenta)
M.T. Pinorini-Godly, S.R. Myers (Louisville, KY) 209–217

Immunotoxicology

Immunotoxicity of the pyrethroid insecticides deltametrin and α-cypermetrin
(No immune effects of alpha-cypermethrin were found in rats treated orally for 28 days whereas deltamethrin affected thymus and lymph node weight, and increased PFC and response and NK cell activity)
C. Madsen, M.H. Claesson, C. Röpke (Soeborg, Copenhagen, Denmark) 219–227

Announcement 229
Contents of journals relating to Toxicology 231–239
Author index 241
